

Automata General

Leave free when playing Velox Mode

Character:

- Greedy
- Defensive

Sets:

- Common
- Velox

Whenever an automata decision is ambiguous, a player (from the same team if possible) decides in the automata's best interest.

Difficulty

easy

medium

hard

Explore

Aggressive: Explore tiles close to the enemy

Defensive: Explore tiles far away from the enemy

The automata rotates the tile trying to place the resources as close to a friendly Towncenter as possible with this priority:

Build / Recruit / Research / Progress

If the automata is missing resources or construction sites to perform the action, it first collects or builds them with free villagers. They walk if necessary or advantageous.

Gathering

Greedy: Deplete resource if possible

Frugal: Prevent resource depletion if possible

Military

After performing the plan cards, each automata piece with an attack action attempts the following steps:

The piece chooses a target within attack distance (move range + attack range) according to this priority:

Defensive:

lowest armor of corr. type ➤ lowest health ➤ highest reward ➤ nearest target

Aggressive:

lowest armor of corr. type ➤ lowest health ➤ highest reward ➤ nearest target

The piece moves toward the target such that it is within attack range and performs the attack action. If not able to attack target:

Defensive: No movement **Aggressive:** Chose target outside range and move toward it.

Remaining splash damage is applied to an adjacent target according to the priorities given above.
