Turn Overview

Your turn: Your turn starts as soon as you begin the income phase.

►1 Income phase

If playing with locked actions:
Perform the locked actions with action points from the supply in any order of your choosing.

Collect income from your buildings, technologies, faction abilities and age card.

►2 Hand limit

If you have more than 7 blessing cards, use or discard blessing cards until you have 7.

►3 Action phase

Use the action points you collected in the income phase to perform actions on cards.

Enemy turn: Your turn ends as soon as you performed your last action.

During your enemy's turn, you may explore up to 3 tiles in visibility range .
If you do not start the game, you may already explore during the enemy's first turn.

Player Help

Action Overview

- Move by the indicated number of steps or fewer.
- Move by at least one step.

- Gather a resource next to your unit.
- Roll a dice. 7 and above depletes the resource.

- Build next to your unit. You can build normal, simple and neutral buildings.

Attack a target within range of your unit.

- Attack value = Dice roll(s) + attack modifiers
- Armor value = Target armor of same type
- Damage = Attack value / Armor value of enemy (rounded down)

- Attack with splash damage. Works similar to normal attack. But when target is destroyed, you may apply the remaining attack value on a second target next to the first.

- Recruit a unit. Pay its cost and place it next to or within the recruiting building.

- Research a technology. Pay its cost and place its card in your play area.

- Convert a target within range. Roll a die and apply modifiers. If conversion value is at least as high as the attackers conversion armor, the conversion succeeds. By default, a target's conversion armor is zero.

- Heal a target within range by one health point.

- Progress to next age by placing a cube on the age card.
- For the first cube, check the conditions and pay the cost.
- You immediately reach the next age, when the last progress cube is placed.
